

# DOGS AND PUPPYS

Lucy

This report is about dogs and puppies. People can find lots of information about puppies and dogs. They are normally kept as house pets.

## Dogs vision

Dogs vision is quite like humans except dogs can't see green or red. All dogs can see different shades like yellow and blue.

## vets + injections

All puppies need an injection so they won't get sick or have disease. Puppies need a micro-chip so they can find their way home and men they get lost or vet can take the dog or puppy back home.

## What dogs can eat

Dogs and puppies can't eat onions because they will be sick. They can't eat chocolate or sugar because they might die or have diabetes. They can eat straw or have diabetes.

## walk big dogs and puppies

Big dogs need walking every day even in the rain but small dogs need walking every one or two weeks. If a dog paws are still pink they can't walk outside but they can go in the garden.
