Making Mixtures

1. Sand

Prediction It makes the sand more stickier and easier to make shapes and sandcastles.

Observation The sand stayed at the bottom while the water stayed at the top because the sand is heavier than the water.

2. Salt

Prediction The salt will dissolve until it's just water.

Observation The salt dissolved in the water.

3. Insta Snow

Prediction It will do the same as the salt.

Observation It absorbed and got bigger.

4. Coffee

Prediction The coffee will dissolve like the salt did.

Observation The coffee dissolved.

5. Soil

Prediction The soil will get very soggy but it won't dissolve.

Observation The soil just got very soggy but didn't dissolve and did nothing else.

6. Tablet

Prediction It will fizz alot.

Observation It fizzed ~~lots~~ and turned into orange water and creates a ~~g~~ and dissolved.

Wonderful detailed investigation. Well done
