## A monster Breakfast

Task: To separate the monster's breakfast or salt  
✓ pepper, pasta, rice and paper clips.

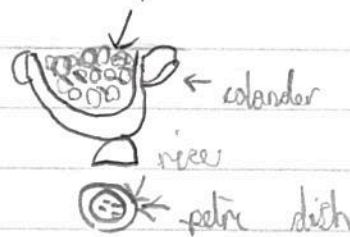

✓ First, we had a magnet to get the paper clips from the mixture

Then, we sieved the salt and paper from the rice and pasta so the salt and pepper rice  
— into a cup

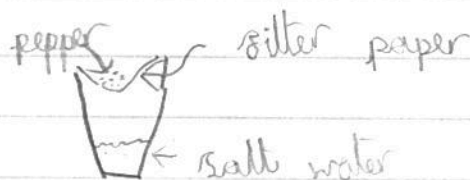

Following that, we used the colander to get the rice out of the pasta. How did this help?

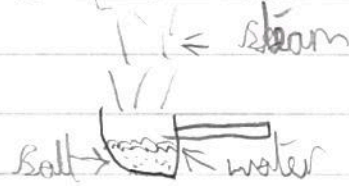

Next, the salt dissolved in the water so the pepper was floating around then we got filter paper to separate it.

How did you separate it with the filter paper?

Finally, we went to the dinner hall to boil the water. When it was boiling, the water evaporate into a gas and at the end the was the salt.

Edjs ✓ well done Liam, you have understood the steps in our experiment. Try and add extra detail to your writing next time.
